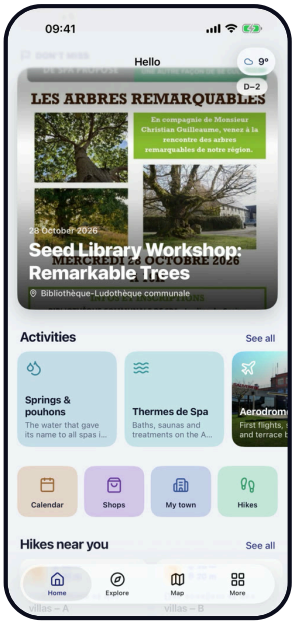
Spa Connect

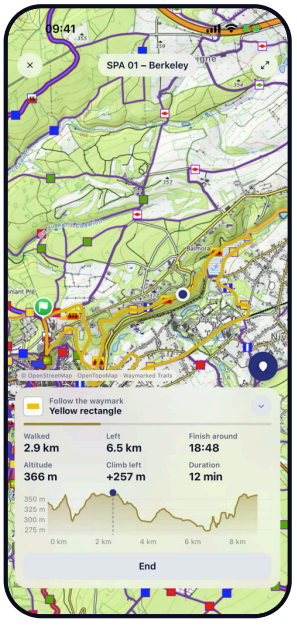
PRESS RELEASE

Spa Connect, the independent app that puts the whole town of Spa in your pocket

Spa, November 2026

Events, guided hikes, places to visit, shops, waste collection, roadworks, buses and trains: Spa Connect brings together in a single free app, with no ads and in four languages, everything you need to enjoy Spa, whether you live there or are just visiting.





Available on iPhone and Android, Spa Connect is published by Aroneus SRL, a company based in Verviers. The app is independent: it is neither published by nor affiliated with the Town of Spa. It brings together public information (the town's calendar and news, tourist offer, local partners, utility operators, public transport) and presents it clearly, updated every day.

For visitors, Spa Connect is a pocket guide: more than 450 places, dedicated screens for activities (thermal baths, springs, airfield, astronomy, museums, sports, food) and 38 hikes with guidance on the map, an alert when you stray from the route and maps kept on the phone for walking without a signal. The big events (Formula 1 Grand Prix, 24 Hours, Francofolies, Spa Rally) have their own screen, with the programme and practical information.

For Spa residents, it is everyday town life: the collection calendar with a reminder the evening before, the on-duty pharmacy, roadworks and closed roads, water and power cuts, the town's decisions summarised in plain language, the next bus and train departures, and a reminder for the parking disc in the blue zone. In the car, CarPlay and Android Auto show the nearest free car parks and charging points.

The app works without sign-up, without ads and without advertising trackers: usage statistics are anonymous and can be turned off. Shops, associations and organisers can ask for access to keep their listing up to date and publish their events.
